Project Name	Smart solutions for Railways

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A sidebar on the left contains various icons for navigation. The main content area shows a table of devices with columns: Device ID, Status, Device Type, Class ID, and Date Added. The first device listed is 'bcc1_1' with status 'Disconnected' and type 'bcc1'. Below the table, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, showing a list of events with columns: Event, Value, Format, and Last Received. The events are generated by a simulation, with values like '["randomNumber":79,"temp":90,"hum":65]'. A modal window is open on the right, titled 'Device Type: bcc1', showing the configuration for a new event type. It includes fields for 'Event type name' (set to 'event_1'), a 'Schedule' (set to 'Every Minute'), and a 'Payload' editor containing a JSON payload:

```
{
  "randomNumber": random(0, 100),
  "temp": random(50, 110),
  "hum": random(50, 100)
}
```

. The modal also has buttons for 'Send', 'Upload a CSV file', 'Cancel', and 'Save'.

The screenshot displays the IBM Watson IoT Platform interface, specifically the 'iot' dashboard. The top navigation bar includes 'Add New Card' and 'Settings'. The main content area features a 'Line chart' card showing a graph of 'randomNumber' over time. The x-axis represents time from 12:48:20 to 12:49:10, and the y-axis represents the value of 'randomNumber' from 0 to 100. The chart shows a fluctuating line representing the random number values. Below the chart, there is a '1 minute' time range selector and a 'now' button. At the bottom right of the dashboard, a status bar indicates '3 Simulations running'.
