

Assignment -4

Distance Detection Using Ultrasonic Sensor

Assignment Date	27 October 2022
Student Name	HEMAPRIYA.K.S
Student Roll Number	622119105029
Maximum Marks	2 Marks

Question-1:

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cms send "alert" to IBM cloud and display in device recent events.

WOKWI LINK: <https://wokwi.com/projects/346502216516895315>

CODE:

```
#include <WiFi.h> //library for wifi #include
<PubSubClient.h> //library for MQTT

void callback(char* subscribetopic, byte* payload, unsigned int payloadLength);

//-----credentials of IBM Accounts-----

#define ORG "f59trs" //IBM ORGANITION ID
#define DEVICE_TYPE "ultrasonicsensor" //Device type mentioned in ibm watson IOT
Platform
#define DEVICE_ID "distancedetection" //Device ID mentioned in ibm watson IOT
Platform
#define TOKEN "AIGMGaaF01nawa1QA3" //Token
String data3;
float dist;

//----- Customise the above values -----
char server[] = ORG ".messaging.internetofthings.ibmcloud.com"; //Server Name
char publishTopic[] = "iot-2/evt/Data/fmt/json"; // topic name and type of event perform
and format in which data to be send
char subscribetopic[] = "iot-2/cmd/test/fmt/String"; //
cmd REPRESENT command type AND COMMAND IS TEST OF FORMAT STRING
char authMethod[] = "use-token-auth"; // authentication method char token[] = TOKEN;
char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID; //clientid

//
WiFiClient wifiClient; // creating the instance for wificlient
```

```

PubSubClient client(server, 1883, callback ,wifiClient);
//calling the predefined client id by passing parameter likeserver id,portand
wificredential

int LED = 4; int
trig = 5; int echo =
18;void setup()
{
  Serial.begin(115200);
  pinMode(trig,OUTPUT);
  pinMode(echo,INPUT);
  pinMode(LED, OUTPUT);
  delay(10); wificonnect();
  mqttconnect();
}
void loop()// Recursive Function
{

  digitalWrite(trig,LOW);
  digitalWrite(trig,HIGH);
  delayMicroseconds(10);
  digitalWrite(trig,LOW);
  float dur = pulseIn(echo,HIGH);float dist
  = (dur * 0.0343)/2; Serial.print
  ("Distancein cm");Serial.println(dist);

  PublishData(dist);
  delay(1000);
  if (!client.loop()) {
    mqttconnect();
  }
}

/* ..... retrieving to
Cloud ..... */

void PublishData(float dist) { mqttconnect();//function call for connecting
  to ibm
  /*
    creating the String in in form JSon to update the data toibm cloud
  */
  String object;

```

```

if (dist < 100)
{
    digitalWrite(LED, HIGH);
    Serial.println("object is near"); object =
    "Near";
}
else
{
    digitalWrite(LED, LOW); Serial.println("no
    object found"); object = "No";
}

String payload = "{\"distance\": "; payload +=
dist;
payload += ", \"object\": \""; payload +=
object;
payload += "\"}";

Serial.print("Sending payload: ");
Serial.println(payload);

if (client.publish(publishTopic, (char*) payload.c_str())) {
    Serial.println("Publish ok"); // if it successfully upload data on the cloud then it will
    print publish ok in Serial monitor or else it will print publish failed
} else {
    Serial.println("Publish failed");
}
}

void mqttconnect() {
    if (!client.connected()) { Serial.print("Reconnecting
    client to "); Serial.println(server);
    while (!client.connect(clientId, authMethod, token)) {
        Serial.print(".");
        delay(500);
    }

    initManagedDevice();
    Serial.println();
}
}

```

```

void wificonnect() //function defination for wificonnect
{
    Serial.println(); Serial.print("Connecting
    to ");

    WiFi.begin("Wokwi-GUEST", "", 6); //passing the wifi credentialsto establish the
    connection
    while (WiFi.status() != WL_CONNECTED) {
        delay(500);
        Serial.print(".");
    }
    Serial.println(""); Serial.println("WiFi
    connected"); Serial.println("IP address: ");
    Serial.println(WiFi.localIP());
}

void initManagedDevice() {
    if (client.subscribe(subscribetopic)) { Serial.println((subscribetopic));
        Serial.println("subscribe to cmd OK");
    } else {
        Serial.println("subscribe to cmd FAILED");
    }
}

void callback(char* subscribetopic, byte* payload, unsigned int payloadLength)
{
    Serial.print("callback invoked for topic: ");
    Serial.println(subscribetopic);
    for (int i = 0; i < payloadLength; i++) {
        //Serial.print((char)payload[i]); data3 +=
        (char)payload[i];
    }

    // Serial.println("data: " + data3);
    // if(data3=="Near")
    // {
    // Serial.println(data3);
    // digitalWrite(LED,HIGH);

    // }

    // else
    // {
    // Serial.println(data3);

```

```

// digitalWrite(LED,LOW);

//    }
data3="";

}

```

OUTPUT:

When object is not near to the ultrasonic sensor

The screenshot displays the Arduino IDE interface with a simulation running. The left pane shows the sketch code, which includes headers for WiFi and MQTT, defines for IBM Cloud credentials, and logic for sending distance data to an IoT platform when no object is detected. The right pane shows a visual simulation of the hardware: an ESP32 microcontroller, an HC-SR04 ultrasonic sensor, and a red LED. Below the simulation, a text log shows the sequence of events: 'no object found', 'Sending payload: {"distance":403.45,"object":"No"}', 'Publish ok', 'Distancein cm233.00', 'no object found', 'Sending payload: {"distance":233.00,"object":"No"}', and 'Publish ok'.

```

Publish ok

Data sent to the IBM cloud device when the object is far

The screenshot displays the IBM Cloud IoT Platform console. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue 'Add Device' button is in the top right. The main content area shows details for a device named 'distancedetection', which is 'Connected' and uses an 'ultrasonicsensor'. The device was last updated on 'Oct 19, 2022 11:56 AM'. Below this, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, showing a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with the following data:

Event	Value	Format	Last Received
Data	{"distance":235.02,"object":"No"}	json	a few seconds ago
Data	{"distance":235.02,"object":"No"}	json	a few seconds ago
Data	{"distance":235.02,"object":"No"}	json	a few seconds ago
Data	{"distance":235.02,"object":"No"}	json	a few seconds ago
Data	{"distance":235.02,"object":"No"}	json	a few seconds ago

At the bottom left, it says 'Items per page 50 | 1-1 of 1 item'. At the bottom right, a status box indicates '0 Simulations running'.

When object is nearer to the ultrasonic sensor

Data sent to the IBM cloud device when the object is near

The screenshot displays the IBM Cloud IoT Platform console. On the left is a dark sidebar with navigation icons. The main content area has a top navigation bar with tabs: 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is located below the 'Browse' tab. In the top right corner, there is a blue button labeled 'Add Device' with a plus icon.

Below the navigation bar is a table listing devices. The table has columns: 'Device ID', 'Status', 'Device Type', 'Class ID', 'Date Added', and 'Descriptive Location'. One device is listed: 'distancedetection' with status 'Connected', device type 'ultrasonicsensor', class ID 'Device', and date added 'Oct 19, 2022 11:56 AM'. To the right of this row is a blue bar with a right arrow and three dots.

Below the device list is a section titled 'Recent Events' with tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected. Below the tabs is a text box stating: 'The recent events listed show the live stream of data that is coming and going from this device.'

Below the text box is a table showing recent events:

Event	Value	Format	Last Received
Data	{"distance":91.77,"object":"Near"}	json	a few seconds ago
Data	{"distance":91.75,"object":"Near"}	json	a few seconds ago
Data	{"distance":91.77,"object":"Near"}	json	a few seconds ago
Data	{"distance":91.79,"object":"Near"}	json	a few seconds ago
Data	{"distance":91.8,"object":"Near"}	json	a few seconds ago

At the bottom right of the console, there is a status box that says '0 Simulations running'.
